

SB 4000 & 4500

The back-office power you need.

- The performance of a small sorter within a desktop design
- High capacity autofeeder
- MICR/OCR/barcode reading and superior imaging
- Voiding and endorsing options

PAPER HANDLING

- Autofeeder (~400 docs.)
- Double feed control
- 3 stackers (200/200/25 docs.)
- Doc. size: length 100-210 mm
height 52-104 mm
- Speed: 433 mm/sec (*SB 4000*)
or 866 (*SB 4500*) mm/sec

CODELINE READING

- MICR (E13B, CMC7)
- OCR (OCR-A, OCR-B, E13B)
- Barcode

IMAGE CAPTURE

- Duplex, 200 or 100 dpi
- 256/16 grayscale
- Various image formats

OPTIONS

- Rear inkjet printer
- Front or rear roll-on stamp

INTERFACE

- SCSI-2 or USB 2.0

The Seac Banche **SB 4000** is suitable for data capture and document imaging requirements based on checks and check-sized financial documents such as credit transfer slips, travellers cheques, utility bills and other vouchers.

This peripheral unit combines the complete document processing capabilities of the internationally successful RDS 3000 with the high throughput and capacity of a small reader sorter (within a much smaller footprint), making it ideal for a daily workload of several thousand documents in back-office applications, with an attractive price/performance ratio and surprising versatility.

Depending on processing requirements and document size, the basic SB 4000 can achieve a throughput up to 100 documents per minute, while the enhanced version **SB 4500** can double the performance reaching up to 200 dpm.
